

Data sheet

Solenoid valves with FKM isolating diaphragm 2/2-way direct-operated

Type EV212B

The isolating diaphragm design ensures that no fluid enters the armature area which means valves can be used for

- aggressive fluids
- fluid with impurities
- fluid with risk of lime stone build up

Applications

- Dosing in fx.
- Marine ballast water treatment systems
- Washing systems (Alkaline)
- Pump cooling fx. vacuum systems

Features

- Stainless steel body
- Differential pressure: up to 12 bar
- Viscosity: up to 50 cSt
- Ambient temperature: up to 50 °C
- Media temperatures up to 50°C
- Coil enclosure: up to IP67
- Thread connection: from G1/8, G1/4, G3/8
- Kv: up to 0.55 m³/h

Data sheet | Solenoid valves with FKM isolating diaphragm 2/2-way direct-operated, type EV212B

EV212B DN 2; 3; 4; 4,5 mm
FKM seal
NC SS body

- In accordance with:
 - Low Voltage Directive 2014/35/EU
 - EN60730-1
 - EN60730-2-8
 - Pressure Equipment Directive 2014/68/EU
- RoHS Directive 2011/65/EU

Technical data

Type	EV212B		
Installation	Optional, but vertical solinoid system is recommended		
Max working pressure (MWP)	12 bar		
Differential pressure	See table		
Max. test pressure	16 bar		
Ambient temperature	Max. 25 °C		
Medium temperature	0 – 50 °C		
Viscosity	Max. 50cSt		
Materials	Valve body:	Stainless steel	W.no. 1.4404 / AISI 316L ¹⁾
	Flange for isolating diaphragm:		W.no. 1.4404 / AISI 316L ¹⁾
	Isolating diaphragm:	FKM	
	O-rings:	FKM	
	Fluid above isolating diaphragm:	Silicone oil	

¹⁾ W. no. according to DIN 17440

Function

1. Closing spring
2. Armature
3. Isolating diaphragm
4. Orifice
5. Coil

2/2-way direct-operated

When voltage is applied to the coil (5), the armature (2) with the isolating diaphragm (3) is lifted clear of the valve orifice (4) and opens for flow through the valve. The valve is open as long as there is voltage to the coil.

When voltage is disconnected, the isolating diaphragm (3) is pressed down against the orifice by the spring (1). The valve will be closed for as long as the voltage to the coil is disconnected. The isolating diaphragm keeps the medium away from the actuator.

The space above the isolating diaphragm is filled up with silicone oil.

EEC Electronic coil controller

EEC electronic coil controller for solenoid valves, type EV220B.

The EEC gives the coil a short over-boost, and controls the armature speed:

- Low power consumption (holding power: 4 W)
- Reduced noise during operation
- Increased MOPD compared to standard coils
- Increased lifetime of the solenoid valve
- Enclosure:
 - IP67 version
- In accordance with:
 - Low Voltage Directive 2014/35/EU
 - EN60730-1
